 Bishnu Parajuli

Career Objective

Dedicated and detail-oriented individual with a strong foundation in software development and data analytics. Passionate about leveraging data to solve complex, real-world problems, including applications in sports analytics. Focused on building intelligent, scalable systems through expertise in databases, data analytics, and data visualization. Committed to continuous learning, innovation, and long-term contribution to impactful technologies in the evolving tech landscape.

Education

BSc (Hons) Computing	(2023 - Present)
Islington College London Metropolitan University Kamalpokhari, Kathmandu	
SLC	2022
Capital College and Research Center NEB Balkumari, Lalitpur	
SEE	2020
Subijimur Memorial Secondary School NEB Sundar Haraincha-12, Morang	

Professional Experience

Data Management & Analytics Intern, <i>Volunteers Initiative Nepal (ViN)</i> 	11/2025 – 01/2026
Designed a centralized database and application for Volunteers Initiative Nepal using PostgreSQL and Python scripts to streamline data management, cleaning, and analytics.	Kathmandu, Nepal

Skills

Technical Skills

- Programming: Python, JavaScript, HTML/CSS
- Frameworks: React, Node/Express
- Data: SQL, PostgreSQL, SSMS, Data Cleaning & Analytics
- Visualization Tools: Power BI, Tableau, Excel
- Tools: Git, Jupyter Notebook, VS Code, MS Office
- OS: Windows, Linux (basic)

Soft Skills

- Communication
- Problem Solving
- Empathy and active listening
- Critical & Analytical Thinking

Projects

Academic Projects

1. NYC 311 Dataset Analysis [↗](#)

Technologies used: Python, Jupyter Notebook, Pandas, Matplotlib

Cleaned and visualized complaint data to identify service request patterns across NYC boroughs. Gained practical experience in real-world dataset handling and exploratory data analysis.

2. PharmaTrack-FYP [↗](#)

Technologies used : PostgreSQL, React.js, Node.js, Express

A comprehensive pharmacy management application developed for final year project. Tracks inventory stocks, medicine sales billing, user management, and issues automatic expiry warnings.

3. Big Data & Football ETL Project with PySpark [↗](#)

Technologies used: PySpark, Superset, Debian, SQL

Developed scalable ETL pipelines for large datasets, including football statistics and historical records. Processed and transformed data using PySpark, deployed in a virtual Debian environment, and created interactive dashboards with Apache Superset for real-time analytics and insights.

4. AutoBolt [↗](#)

Technologies used: React.js, C#, PostgreSQL

A full-stack automotive service booking platform. Separated into decoupled React frontend and C# backend architectures to provide vehicle servicing updates and mechanic availability.

5. Higgs Boson Particle Classification [↗](#)

Technologies used: Python, Pandas, Scikit-Learn, XGBoost, Matplotlib

Machine learning classification model predicting Higgs Boson particle decay signals from CERN collision datasets. Implements high-dimensional feature engineering, null value imputation, and gradient-boosted decision trees.

Personal Projects

1. SQL & Excel Data Analytics Project [↗](#)

Technologies used: SQL, Microsoft Excel, SSMS

Analyzed Covid-19, Nashville housing, and sales data using SQL queries in SSMS. Created PivotTables, dashboards, and data reports using Excel. Demonstrated data cleaning, joins, aggregations, and data exploration techniques.

2. Power BI & Tableau Dashboard Projects [↗](#)

Technologies used: Tableau, Power BI, CSV data files.

Built interactive dashboards using Power BI and Tableau to visualize data from Airbnb, vgsales, and apocalypse food preparation datasets. Applied DAX, Power Query, and calculated fields to model relationships and deliver insights.

3. Python & Pandas Data Analytics Project [↗](#)

Technologies used: Python, Pandas, BeautifulSoup, Jupyter

Worked on multiple real-world datasets (movies, call logs, global population). Developed tools like an automatic file sorter and BMI calculator. Applied data wrangling, web scraping, and EDA techniques using Pandas and BeautifulSoup.

Training and Certificates

AWS Academy Graduate - AWS Academy Machine Learning for Natural Language Processing [↗](#)

AWS Academy Graduate - AWS Academy Data Engineering [↗](#)

AWS Academy Graduate - AWS Academy Machine Learning Foundations [↗](#)

AWS Academy Graduate - AWS Academy Cloud Foundations [↗](#)

Data Structure and Algorithms [↗](#)

Exploring Big Data with PySpark for Analytics and Insights [↗](#)

Data Management and Analytics Internship (ViN) [↗](#)

Key Highlights

Completed 4 AWS foundational certifications in cloud, ML, and analytics

Completed Full Data Analyst Bootcamp
